6.2 Explanation of negative profit after tax in the the First Half of 2026 and changing by more than 10% compared to the corresponding period of the previous year:

Profit after tax for the first six months of 2026 recorded a loss; however, the loss decreased by 16.75% compared to the same period last year. The main reasons are as follows:

- Due to the impact of the global economic downturn and increasingly complex geopolitical developments, market demand has been unstable. In addition, the Company continues to face pressure from high-cost inventory, while selling prices have not been sufficient to offset cost of goods sold, resulting in a gross loss of VND 5.19 billion for the period.
- During the period, the Company proactively implemented cost optimization measures, including reductions in financial expenses and general and administrative expenses compared to the same period last year (decreased by approximately VND 2.85 billion), thereby contributing to an improvement in overall business performance.

As a result, despite the gross loss, the Company's after-tax loss for the first six months of 2026 has improved compared to the same period last year.
