6.2 Explanation of the net profit after tax for the fourth quarter of 2025 recording a loss, shifting from a profit in the corresponding period of the previous year to a loss in the current period, and changing by more than 10% compared to the same period last year

In the fourth quarter of 2025, the Company's production and business activities continued to be adversely affected by the overall market conditions, particularly due to sluggish consumption and weakened purchasing power. The Company's net revenue reached VND 34.61 billion, representing a decrease of 1.7% compared to the same period in 2024. During the period, the Company recorded an accounting adjustment related to depreciation expenses for 2025, specifically reclassifying depreciation expenses from other expenses to cost of goods sold in the amount of VND 11.82 billion in accordance with applicable accounting regulations. This reclassification increased the cost of goods sold for the period, resulting in a gross loss of VND 13.25 billion in the fourth quarter of 2025.

As a result of the above factors, the Company recorded a net loss after tax of VND 3.43 billion in the fourth quarter of 2025, compared to a net profit after tax of VND 13.74 billion in the same period of 2024, which was mainly attributable to income arising from the disposal of fixed

assets. Accordingly, the net profit after tax for the fourth quarter of 2025 decreased by 125.03% compared to the same period of the previous year.
